Title: **Jumping the Paywall**

Subtitle: How to freely share research without being arrested

Speaker: **Storm Harding**

**Short:** *This presentation will identify and address two safety-critical problems permeating research today: lack of total free access to scholarship, and the looming threat of apprehension for trying to facilitate said free access. In other words, this presentation will explore how to procure access to all-too-often restricted content sequestered behind extortionate academic paywalls, and how to then safely freely disseminate said content without being apprehended.*
